Re the Fact Sheet, Bart and Bill coordinated & took care of this on approx 1/23. It was corrected.

Bill reported to me this morning on the Wilcox meeting last night. Bart and Bill didn't get back to the hotel until 10pm. Meeting went well. Good crowd, good questions, good contacts and information. Approx 75 people attended.

Another fyi: Amy Brittain had sent me an email stating they want the lead for this site. I sent to Cathy Gilmore, Carlene, John M., Tony. This seems to be part of the bigger issue with ODEQ which Carl is well aware of and discussed earlier this week. The meeting last night was put on by ODEQ. Bart and Bill attended/participated.

Tony and Joy,

I am not sure if these comments are needed at this moment. [Brenda concurred with ODEQ](#). There was no due date. Anyway I just wanted to share with you. Please refer to Brenda's comments.  
Ben

Pam

I wanted to make sure you knew ODEQ is taking issue with our facts. Are they correct?

Diane.

**Subject:** RE: Electronic Fact sheet Wilcox

All,

The attached Wilcox Fact Sheet contains an inaccuracy that deserves attention. Under *The **Wilcox Oil Company Site*** section, last sentence:

"Elevated levels of metals were also detected in three private residential wells on site, and from three wells adjacent to the property."

All private wells on the Wilcox Superfund Site and three adjacent to the site were sampled by Oklahoma Department of Environmental Quality (DEQ) while being investigated under the Preliminary Assessment/Site Inspection (PA/SI) process.

Sample results showed low levels of metals in ground water samples when compared to samples from a background (upgradient) well, but far below a Maximum Contaminant Level (MCL) for the metals detected.

It is important to point this out because the statement about elevated metals is from the context of investigations performed under the PA/SI model, not from a risk standpoint, and could be misleading to the public.

Thank you.
